# **EUROPEAN CULTURAL LAW (IV) and legislation of the Russian Federation on culture**

*Sergey N. MOLCHANOV*

\*\*\*\*

**Moscow - Yekaterinburg**

**2007**

*The World, Earth, and also Europe and Russia, entered new century and new millennium.*

*Alongside with them, on the eve of calendar epochs and cultural eras, Europe sees fundamental values re-evaluation, historical destruction of times and viewpoints, related to irreversible changes both in ecology of nature, human being and space and evolutionary shifts of legal consciousness and vital activity of social and cultural layers, states and nations.*

*Our future is impossible without special, pensive and unbiased comprehension of the past, which can be highlighted by a legal phenomenon – cultural heritage, on the other hand, our future is impossible without it, without patrimony embodying ties of all the times – the past, present and future – with target basis and transfer of consciousness to forthcoming performances, cultural aims and creation achievements.*

*Patrimony is a living culture, constant, sustainable and renewable process of self-cognition and perception of environment, living creation of interaction and legal transformation, co-creation (of ecology) of the space, Earth and whole mankind, as their full and valuable subject.*

*The future of international, interstate and interethnic communities is also impossible without patrimony (culture, light, rhythm and law).*

*European cultural law unites, without entangling, all these creative and developing notions, concepts, meanings, leaving the right to choose to a reasonable fate-creating human being.*

*Which way will you choose and where will you go, Europe? Russia, our motherland, where will you make your way?..*

*Cultural law represents and offers you a bright, reasonable and ecologically pure perspective...It is up for you to choose...*

Author

## Contents

*§1. The CE law on culture in the system of European cultural law*

*§2. The CE European treaties as sources of common (regional) international law*

*§ 3. International liabilities secured in the CE Statute as generally recognized principles of (European) international law, or the imperative norms of customary pan-European (regional) international law*
